Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Claims 11-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 3.
2. Applicant's election without traverse of Group I, the container, in Paper No. 3 is acknowledged.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Zettle (U.S. 5,900,293). Zettle teaches a blow molded bowl, shown in figure 2 (see col. 4 lines 54-57). The lower frustum section is element 26, and the upper frustum section is element 24. The lid is element 21. The threads 20 show that the lid is rotatably secured to the bowl. The skirt of the lid 21 is considered the lower lip and it is received in the recess formed above wall section 22 at 12. In col. 3 lines 24-43, Zettle teaches that the bowl is made of polypropylene.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3727

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zettle in view of Randall (U.S. 5,996,882). Zettle discloses the claimed invention except for the container being made of a multi-layer plastic. Randall teaches that it is known to make a container of a multi-layer plastic (see col. 10 lines 43-55). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the container of Zettle made from the multi-layer structure taught by Randall, in order to give the container a desired flexibility while not compromising the effective sealing qualities of the container.

7. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zettle in view of Fortuna (U.S. D279,550). Zettle discloses the claimed invention except for the container having a diameter greater than the height. Fortuna teaches that it is known to provide a container with a diameter greater than the height. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the container of Zettle with an increased diameter, as taught by Fortuna, in order to increase the capacity of the container and provide the container with increased stability.

8. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zettle in view of Edwards (U.S. D270,814). Zettle discloses the claimed invention except for the standing ridge. Edwards teaches that it is known to provide a container standing ridge (see figure 3). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the container of Zettle with a standing ridge, as taught by Edwards, in order to support the bottom wall of the container above the supporting surface.

Art Unit: 3727

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is cited for the upper and lower frustum sections.

10. This action is NON-FINAL.

11. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703)305-3579. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into group 3720 will be promptly forwarded to the examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Niki M. Eloshway whose telephone number is (703) 308-1606. Any inquiry of a general nature or relating to the status of this application should be directed to the 3700 Customer Service Office at (703) 306-5648.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any). If an application number has not been assigned to the application, this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
